

Video Conferencing Service

Effective and safe care without the need to travel

Our video conferencing solution sits within the HSCN network, meaning your meeting, whether it's between a healthcare professional and a patient or between colleagues, is safe and secure

Key features

- Accessible over a web browser and does not require a separate application, making it easy to use.
- The user has control over whether they enable their camera or instead, just use their microphone.
- Can be used for patients in their own homes or care homes.
- There is no limit to the length of the video conferencing sessions.
- The service includes a chat functionality.
- Integration into GP and hospital PAS systems.
